Passamaquoddy Tribal Brownfields Program

What is it?

The Tribe receives annual grant funding from the USEPA to:

- Support and enhance the Sipayik Environmental Department.
- Develop Environmental Guidelines.
- Establish a Brownfields Sites inventory.
- Investigate and clean-up Sites.
- Conduct re-use planning.

What is a Brownfields?

A Brownfields is a property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant.

What are the Goals of the Brownfields Program?

The goals of the Tribal Brownfields Program are to protect human health and the environment through the identification, investigation, remediation, and reuse of potentially contaminated Tribal lands.

What are the Benefits of this Program?

Brownfields properties have been negatively impacted by dumping, chemical leaks and/or spills, asbestos, lead paint, and mold. The Tribal Brownfields Program can investigate and clean-up these properties to remove the environmental risks allowing the safe reuse of the property for housing, economic growth, or open greenspace for traditional and spiritual tribal uses.

Successful Brownfields Property

Corner Store

Investigation and Remediation of petroleum, mercury, and asbestos

The building was demolished and the site is available for tribal reuse.

GET INVOLVED

We want to hear from you!

If you would like more information on the Tribal Brownfields Program and/or know of properties that would benefit from this Program please contact:
